

Welcome

Welcome to PACRIM 10 in Coronado!

Welcome to the 10th Pacific Rim Conference on Ceramic and Glass Technology (PACRIM 10) in the great city of Coronado! This conference is the tenth in a series of international conferences that provide a global forum for presentations and information exchange on the latest emerging ceramic and glass technologies. The conference series began in 1993, and was last organized by The American Ceramic Society in 2009, in Vancouver, British Columbia. Over the years, PACRIM conferences have established a prominent reputation for state-of-the-art presentations and information exchange on the cutting-edge ceramic and glass technologies. They have facilitated global dialogue and discussion with leading global experts, practitioners, and end-users.

The plenary session titled "***Future Energy Challenges and Opportunities for Ceramics***" features Jeff Wadsworth, President and CEO of Battelle Memorial Institute; Hong-Kyu Park, Fellow of LG Chem Battery R&D, Korea; Tomoyoshi Motohiro, Toyota Central R&D, Japan; and M. K. Badrinarayan, VP & Research Director, Inorganic and Broad-based Technologies, Corning Incorporated. The PACRIM 10 technical program covers a variety of topics that identify global challenges and opportunities for various ceramic technologies. The program fosters discussions on the future of specific fields on a global scale. It delivers a forum for knowledge exchange and facilitates new contacts from around the world. PACRIM 10 also includes the 2nd International Richard M. Fulrath Symposium on Frontiers of Ceramics for Sustainable Development.

PACRIM 10 also includes the important topics covered in the Glass and Optical Materials Division (GOMD) Annual Meeting. See the GOMD section of this program for more information. In addition, we are pleased to host the inaugural Darshana and Arun Varshneya Frontiers of Glass Science lecture, which will be given by Walter Kob, University of Montpellier 2, France, as the opening lecture of the Glass & Optical Materials Division program.

I would like to sincerely invite all of you to take advantage of this unique opportunity to visit Coronado and actively participate in this conference. We hope to provide an excellent forum for interaction and developing friendships with participants from various continents, who are involved in research, development, engineering, manufacturing, and application of ceramic and glass materials.

I hope you enjoy the conference!
