Welcome

On behalf of the Engineering Ceramics Division and the American Ceramic Society, I warmly welcome you to the 39th International Conference & Exposition on Advanced Ceramics & Composites (ICACC). ICACC is the most prominent international conference in the area of advanced structural and functional ceramics, composites, and other emerging ceramic materials and technologies. This prestigious conference has been organized by the Engineering Ceramics Division (ECD) and The American Ceramic Society since 1977.

Topical areas at this conference include advanced structural, functional and nanocrystalline ceramics, composites, and other emerging ceramic materials and integration technologies. The technical program of ICACC 2015 consists of thirteen Symposia and six Focused Sessions. The ICACC Exposition, held on Tuesday and Wednesday evenings, will provide a place for attendees to connect with business partners, develop prospects and explore new business opportunities — all in one place at one time. Poster sessions will again be held in conjunction with the Expo.

The well-established symposia at this conference include Mechanical Behavior and Performance of Ceramics and Composites, Advanced Ceramic Coatings, Solid Oxide Fuel Cells, Armor Ceramics, Bioceramics, Nanostructured Materials & Nanotechnology, Advanced Processing & Manufacturing Technologies (APMT), Advanced Materials and Technologies for Energy Generation and Rechargeable Energy Storage, and Porous Ceramics. In addition, two key symposia Materials for Extreme Environments: Ultrahigh Temperature Ceramics and Nano-laminated Ternary Carbides and Nitrides and Advanced Ceramics and Composites for Sustainable Nuclear Energy and Fusion Energy; are back for their fifth years and will continue to build upon past success. The Nuclear and Fusion Energy symposium is co-sponsored by the ACerS Nuclear and Environmental Technology Division. In addition, the symposium entitled Virtual Materials Design and Ceramic Genome will again form part of the strong technical program. We also welcome the addition of a new symposium entitled Industrial Root Technologies for Ceramics and Composites.

ICACC 2015 will include six Focused Sessions on emerging technologies: Geopolymers, and Advanced Ceramic Materials and Processing for Photonics and Energy return for 2015. New focused sessions introduced this year include Materials Diagnostics and Structural Health Monitoring of Ceramic Components and Systems, Additive Manufacturing and 3D Printing Technologies, Single Crystalline Materials for Electrical, Optical and Medical Applications, and Field Assisted Sintering and Related Phenomena at High Temperatures. Building upon the successful interactions and excitement generated in the first three years, the 4th Global Young Investigator Forum (GYIF) will again be organized and facilitated by a group of our young researchers. Finally, we are pleased to announce that the 2nd European Union - USA Engineering Ceramics Summit will again be held at the 2015 ICACC.

Our special thanks go to our sponsors including UBE Industries Ltd., Corning Incorporated, GE Aviation, T.R. Ltd., Furuya Metal Corp., American Elements, A-Tech, KITECH, Mechronics, Jn LTech, and the Army Research Office whose generous support facilitates a more successful conference.

The ECD Executive Committee and volunteer organizers, together with The American Ceramic Society, thank you for joining us in Daytona Beach, Florida for what should be a stimulating and beneficial experience.
