Ease Quality Reach Impact

WELCOME

On behalf of the Engineering Ceramics Division and The American Ceramic Society, I warmly welcome you to the 41st International Conference & Exposition on Advanced Ceramics & Composites (ICACC). ICACC continues its strong tradition as the leading international meeting on advanced structural and functional ceramics, composites, and other emerging ceramic materials and technologies.

Since its inception in 1977, this prestigious conference has been organized by The American Ceramic Society (ACerS) and the Society's Engineering Ceramics Division (ECD). Over the years, the conference has experienced tremendous growth in interest and participation from ceramic researchers and developers from national, regional, and global technical communities. This year's meeting continues the tradition for its 41st year.

Topical areas at this conference include advanced structural, functional and nanocrystalline ceramics, composites, and other emerging ceramic materials and integration technologies. The technical program of the ICACC 2017 consists of fifteen Symposia, three Focused Sessions, the 3rd Pacific Rim Engineering Ceramics Summit, and 6th Global Young Investigator Forum. The ICACC Exposition, held on Tuesday and Wednesday evenings, will provide a place for attendees to connect with business partners, develop prospects and explore new business opportunities — all in one place at one time. Poster sessions will again be held in conjunction with the Expo.

The well-established symposia at this conference include Mechanical Behavior and Performance of Ceramics and Composites, Advanced Ceramic Coatings, Solid Oxide Fuel Cells, Armor Ceramics, Bioceramics and Biocomposites, Advanced Materials and Technologies for Direct Thermal Energy Conversion and Rechargeable Energy Storage, Functional Nanomaterials and Thin films for Sustainable Energy Harvesting, Environmental and Health Applications, Advanced Processing & Manufacturing Technologies (APMT), Porous Ceramics and Virtual Materials Design and Ceramic Genome. In addition, two key symposia titled Materials for Extreme Environments and Advanced Materials for Sustainable Nuclear Fission and Fusion Energy are back for their seventh year and will continue to build upon past success. The Nuclear Energy symposium is co-sponsored by the ACerS Nuclear and Environmental Technology Division. Advanced Materials and Innovative Processing Ideas for the Production Root Technology and Crystalline Materials for Electrical, Optical and Medical Applications will again be part of the strong technical program. In addition, one new symposium: Additive Manufacturing and 3D Printing Technologies will round out the technical program.

The ICACC 2017 will include three Focused Sessions on emerging technologies: Geopolymers, Chemically Bonded Ceramics, Eco-friendly and Sustainable Materials and Advanced Ceramic Materials and Processing for Photonics and Energy, as well as Carbon Nanostructures and 2-D Materials and Composites.

We are extremely pleased that the 3rd Pacific Rim Engineering Ceramics Summit will be held at ICACC 2017 to bring together representatives from the Engineering Ceramics Division and experts from Pacific Rim countries to foster information exchange on current status and emerging trends in innovative and sustainable ceramic technologies. The 6th Global Young Investigator Forum (GYIF) will again be organized and facilitated by a group of our young, up and coming researchers.

Our special thanks go to our sponsors including Wiley, Battelle, KITECH and Mecharonics, Hysitron, Furura Metal Americas, Applied Research Center, Saint-Gobain, The Korean Ceramic Society and American Elements whose generous support facilitates a more successful conference.

The ECD Executive Committee and volunteer organizers, together with The American Ceramic Society, thank you for joining us in Daytona Beach, Florida for what should be a stimulating and beneficial experience.

P.S. Please be reminded that no photography, audio recording, or videotaping of presenters in oral sessions is permitted. See policy on pg iv.

Experience the Next Generation of Material Science Catalogs

As one of the world's first and largest manufacturers and distributors of nanoparticles & nanotubes, American Elements' re-launch of its 20 year old Catalog is worth noting. In it you will find essentially every nanoscale metal & chemical that nature and current technology allow. In fact quite a few materials have no known application and have yet to be fully explored.

But that's the whole idea!

American Elements opens up a world of possibilities so you can **Now Invent!**
