

Southwest Section of the American Ceramic Society

THE ROBERT & MARY BUTTLE SCHOLARSHIP PROGRAM **APPLICATION DEADLINE FOR APPLICATIONS: May 1, 2020**

The Robert and Mary Buttle Scholarship Fund was established in 1993 to help students finance their college education. An explosion of unthought-of ceramic products and processes within the preceding 50 years has created exceptional opportunities for ceramic engineers and scientists. There is particular need for applied and production engineering, as well as scientists.

Students of a recognized two- or four-year program of ceramic engineering or ceramic materials science are invited to apply for a grant from this fund, following the successful completion of their first year. Complete this application and enclose a recommendation from the department head or advisor. Be sure that qualifications are met according to the following criteria, listed in order of priority.

SCHOLARSHIP GRANTS ARE MADE USING THE FOLLOWING PRIORITIES:

1. Evidence of dedication to ceramic sciences
2. Scholastic record
3. Financial need
4. Well-rounded personal character
5. Should more than one applicant be deemed equally eligible, the permanent resident of one of the following areas will be selected: Arkansas, Kansas, Louisiana, Oklahoma, Texas, Mississippi, Alabama, Georgia, Tennessee, North and South Carolina, and the border states of Mexico.
6. Should more than one applicant remain equally eligible after the above criteria are considered, the applicants may be asked to supply additional information.
