WELCOME

Dear Colleagues and Friends,

Welcome to the Materials Challenges in Alternative & Renewable Energy Conference (MCARE 2021) and 4th Energy Harvesting Society Meeting (EHS 2021), organized by The American Ceramic Society (ACerS), the Korean Institute of Chemical Engineers (KIChE), and the Energy Harvesting Society (EHS).

MCARE 2021 is a premier forum to address opportunities of emerging materials technologies that support sustainability of a global society. MCARE 2021 brings together leading global experts from universities, industry, research and development laboratories, and government agencies to interact collaboratively and communicate materials technologies that address development of affordable, sustainable, environmentally friendly, and renewable energy conversion technologies.

EHS 2021 brings together the academic, government and industrial community from around the world to discuss and to exchange ideas about energy harvesting. In its 4th year, EHS will cover presentations related to energy harvesting; energy storage; potential applications of energy harvesters; emerging materials and device technologies; energy management; solar-thermal converters; multi-junction systems; and wireless power transfer.

We are happy that you are here and appreciate your participation. While we have to stay physically apart, we hope that this meeting will bring our community closer together through the many opportunities for discussion and interaction. We hope you enjoy the meeting and gain from this unique gathering of global scientists and engineers.
