

Publish your PACRIM research today, build upon it tomorrow.

"International Journal of Ceramic Engineering and Science is a unique communication platform targeting engineering and science advances at all stages of ceramic and glass research and application."

— Ricardo Castro, editor-in-chief

You worked hard on your project, but there is more to do. Or perhaps it didn't quite work out as planned. With the prestige of ACerS and broad open access readership, IJCES is the ideal peer-reviewed journal for publishing your sound science and engineering studies, including "works in progress," negative results, confirmations of previous research, reviews, and full reports.

IJCES is accepting PACRIM manuscripts for all confirmed presenters now. We encourage you to submit your article as soon as possible. Please submit by September 1, 2021 for your article to be considered in time to be published for and promoted at the PACRIM conference.

Go to <https://mc.manuscriptcentral.com/ijces> to begin your submission. Authors should mention in the cover letter that 'the contents of this manuscript will be/was presented in PACRIM 2021 (Symposium #, Abstract #)' and in step 6 of the submission process.

With underwriting from ACerS and Wiley the article processing charge (normally US\$1800) is only US\$100 for PACRIM Authors. The deadline for submission for the PACRIM post-conference issue is February 1, 2022.
